**Subject:** GenX and PFBS drinking water state guidance levels - request for updates  
**Attachments:** GenX PFBS regional and State values 021822.xlsx

Good afternoon all,

As briefly mentioned during our Region 4 EPA/States PFAS Meeting, our Office of Water (OW) at HQ is seeking updates to their list of states with established guidelines for **GenX chemicals**; and also for the first time is seeking information on states with guidelines for **PFBS**. This is an effort on their part to ensure that they can engage early with any states that have existing (or are underway developing) guidance for these chemicals in drinking water – prior to the EPA’s issuance of drinking water health advisories later this Spring.

The OW team is specifically looking for the guidance levels, weblinks to any guidance information, and state points of contact. The attached spreadsheet shows information from the previous effort to gather information about GenX, coupled with information imported from ITRC’s PFAS State water and soil levels tracker.

If you have any updates on GenX or information to share for the first time on PFBS, please let me know by **COB Friday, March 4**. Please also reply in the negative if your state does not have or is not planning to develop guidances at this time for either GenX or PFBS. Thanks so much!

Aaryn Jones
